WHEEL CHAIR DENTAL CLINIC

Wheel chair dental clinic was started at MES Dental College on June 8th 2021 to provide quality dental treatment for wheelchair-bound patients by providing access to dental treatment for physically challenged patients with minimal interruption. The concept behind Wheel chair dental clinic is to reduce the challenges of wheelchair bound patients during the arduous transfer from wheelchair to traditional dental chair while also providing easy access to quality dental treatment. This solves the daunting task of transferring wheel chair bound patients multiple times from wheel chair to traditional dental chair. It started to function under Comprehensive dental clinic .Treatment was restricted only to certain procedures due to some limitations. Innovation was done on the previous chair to rectify the drawbacks of first generation chair and started functioning again from April 2022. Currently wheel chair clinic functions under the Department of Public Health Dentistry.
