LEARNING OBJECTIVES – FOR FINAL YEAR STUDENTS

- Students should be able to record detail case history and able to give a definitive diagnosis, prognosis and treatment plan
- Students should be competent enough to suggest appropriate laboratory, radiographic investigations and interpretation of the same.
- Students should be able perform supragingival scaling, subgingival scaling and root planing procedures
- Students should be able to identify and know the use of subgingival scaling instruments and ultrasonic instruments.
- Students should know about proper maintenance of instruments including sharpening.

Minimum clinical requirements mandatory to appear for university examination:

- Long case history and discussion -
- Scaling, oral hygiene instruction - 50 complete cases
- Subgingival scaling and root planing – 15 cases
- Assistance in periodontal surgery – 5 cases
- Seminar- 2
- Complete clinical work done record

TREATMENT PLAN / UNIT PLAN – FOR FINAL YEAR STUDENTS

Discussion

- Detail case history discussion
- Principles of instrumentation and clinical procedures
- Ultrasonic instruments
- Motivation of patients – oral hygiene instructions
- Radiographic interpretation and lab investigation
- Maintenance of instruments

Demonstration

- History taking and clinical examination of the patients
- Recording different indices
- Methods of using various scaling and surgical instruments
- Polishing of teeth
- About different oral hygiene aids
- Periodontal Surgical procedures
- Follow up procedures, post operative care and supervision

LEARNING OBJECTIVES – FOR III YEAR STUDENTS

- Students should be fully aware of the General Principles of Infection Control and Sterilization. Should be able to implement the same in clinical practice.
- Students should have in depth knowledge of Periodontium and related oral structures
- Students should be able to record concise case history before commencement of treatment procedures.
- The students should be able to identify and know the use of diagnostic instruments and supragingival scaling instruments.
- Students should be able to perform supragingival scaling procedures following the principles of instrumentation.
- Students should be able to convey the importance of Maintenance Phase in periodontal health and should be able to train the patients for the same in order to achieve optimum oral health.

Minimum clinical work to be done:

- Clinical discussions
- Pre-clinical exercise in phantom lab
- Supragingival scaling - 10
- First internal clinical exam with viva

MONTHLY PLAN FOR**

2021-22

(FINAL YEAR PART I & THIRD YEAR)

LEARNING OBJECTIVES -FOR FINAL YEAR STUDENTS - 2021

The duration of study is one academic year. In the fourth year of study, the candidate will be allotted long cases for detailed discussion, treatment plan formulation, appliance construction, insertion and management. In addition they will be trained to attend routine out patients, appliance activation cephalometric interpretation etc.

This includes theory classes, clinical postings, seminar and group discussions.

Cognitive

The student must acquire knowledge about

1. Preventive Orthodontics
2. Interceptive Orthodontics
3. Biology and mechanical principles of tooth movement
4. Anchorage
5. Myofunctional Appliance
6. Methods of gaining space
7. Orthopedic Appliances
8. Cleft lip and palate
9. Surgical Orthodontics
10. Principles of management of common malocclusions
11. Removable and Fixed Appliances
12. Retention and Relapse
13. Adult Orthodontics
14. Genetics
15. Computers in Orthodontics

Psychomotor

1. Case history taking
2. To diagnose a case of malocclusion and formulate a treatment plan
3. Impression taking for study model preparation
4. Preparation of study model
5. Study model Analysis
6. Cephalometric X-ray Analysis
7. Fabrication of routine removable and myofunctional appliances using cold cure acrylic
8. Appliance delivery
9. Follow-up adjustments

Affective

1. Conversation with patients
2. Assessing their motivation
3. Motivation of patients
